

Main symptoms of Covid-19*

* Some people are infected with the disease but do not develop symptoms

COVID-19 affects individuals in different ways.

Most infected people develop mild to moderate forms of the disease and recover without hospitalization.

Most common symptoms

Fever

Dry cough

Tiredness

Less common symptoms:

Muscle aches

sore throat

diarrhoea

conjunctivitis

headache

loss of smell of taste

skin rash, or discolouration of fingers or toes

Severe symptoms

Difficulty breathing or shortness of breath

Pain or pressure in the chest

Loss of speech or movement

**If you show severe symptoms,
Immediately consult a health care professional
by phone**

Always call before going to your doctor or to a medical institution.

People with mild symptoms, but who are otherwise healthy, should treat themselves/stay home and self-isolate if possible.

On average, it takes five to six days from when someone is infected with the virus for symptoms to show. However, it can take up to 14 days.
